

# Schools Development Report 2025

The tasks from 2023/24 have all been completed. The aspiration to start a school-orienteeing league did not gain momentum we hoped due to schools not having the funds to travel to compete. There has been significant drop off in requests for school mapping. Have only completed a full package for one school this year.

## **Update on 2025**

I have continued to provide mapping, orienteeing packages, and services for schools and local parks. This includes:

- Provision of replacement POC markers.
- Support to the Eastbourne community sports day.
- Mowden School mapped and training.

## **What for 2026**

It is my intent to target the school trusts of Outwood and Elevate academies to generate more interest. Will continue to provide maps and training as required.

Having reviewed the offer from Josh Jenners Outdoor classroom package, it is my opinion that despite it being a good package it is not financially beneficial to the club. This can be reviewed if the schools interest increases.
